# New 4G! Start!

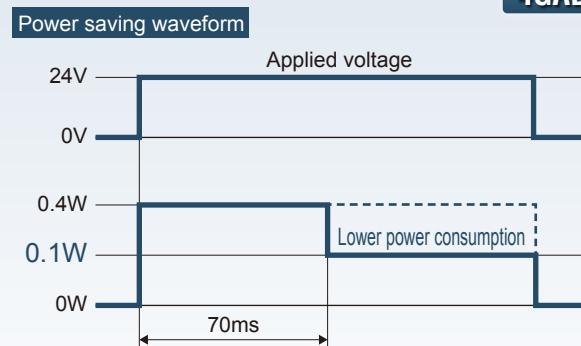

The new 4G is further evolved while inheriting the conventional 4G series concept.  
It starts here.

## Power Consumption

Continuous energization OK (single solenoid type)  
Improved Solenoid Design.

## Lower power consumption

## Safety

Manual override protection  
Manual override with protective covers.

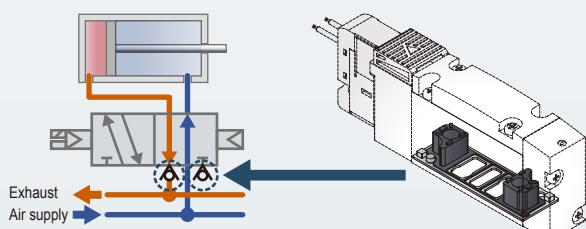

## Contamination prevention

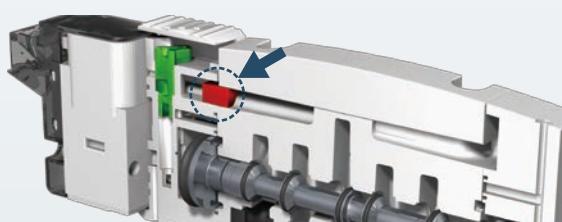

Filter standard equipment  
(Available on A and B ports as an option)

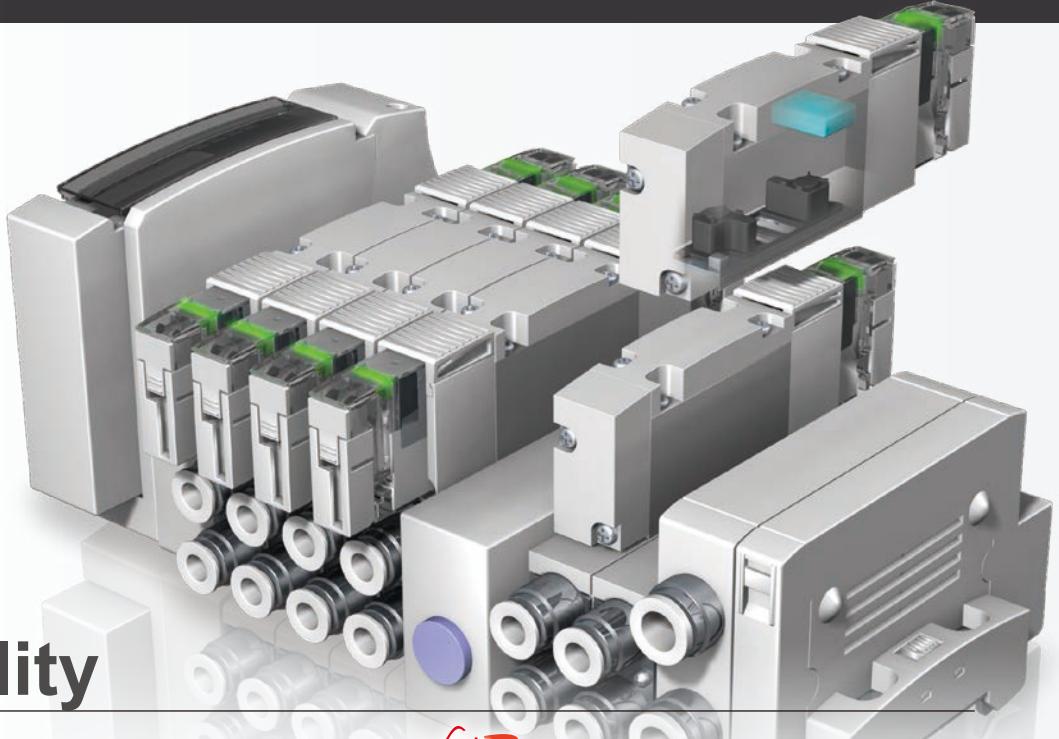

Potential for exhaust back-pressure eliminated.  
Exhaust malfunction prevention valve.  
Standard feature in both metal and plastic base designs.

Internal pilot filter is standard equipment.

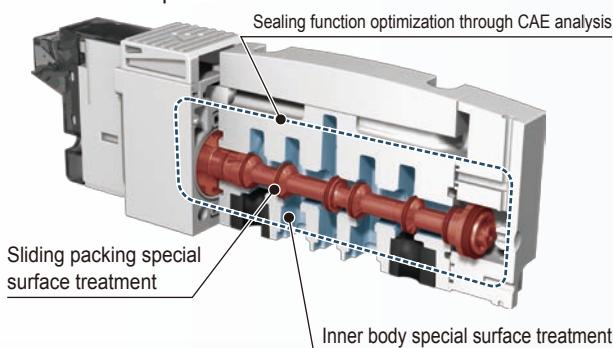

## Reliability

Low friction design with improved life cycle rating

Excellent response time and long life achieved  
with the main spool.

**4GAB**

Life Rating  
**100 million cycles or more**

Single solenoid, through our predetermined conditions

**4GAB**

Response time  
**12±2 ms**  
4G1 test results

Improved response even  
after weekend shutdown

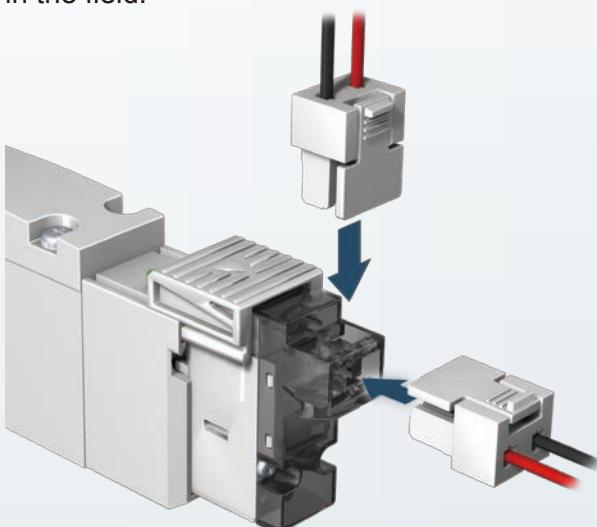

**4GAB**

Smooth start-up even after a prolonged  
shut-down.

## Flexible Functionality

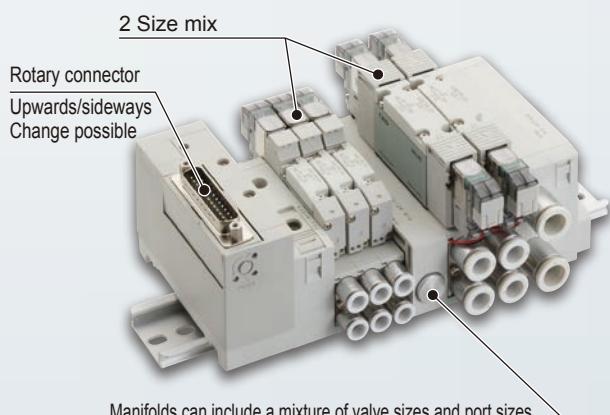

Two-way wiring connector of top or side.

Wire connection orientation is easily adjusted  
in the field.

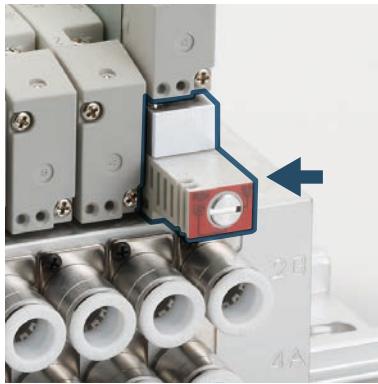

Manifold flexibility

Manifolds can include a mixture of valve sizes  
and port sizes.

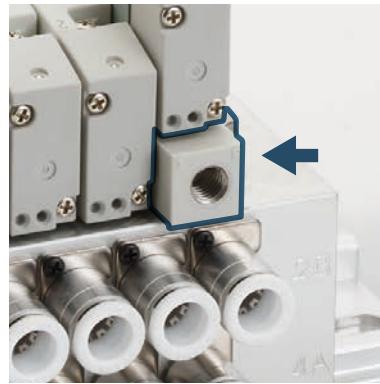

# Variety of options

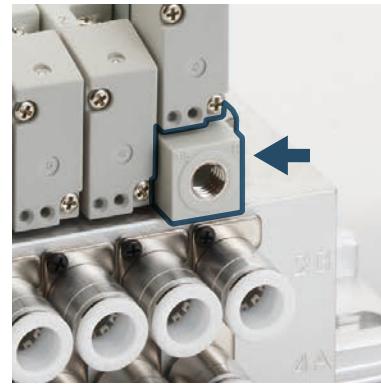

**Individual Valve shut-off**

Valves are individually replaceable without stopping operation of the production line!

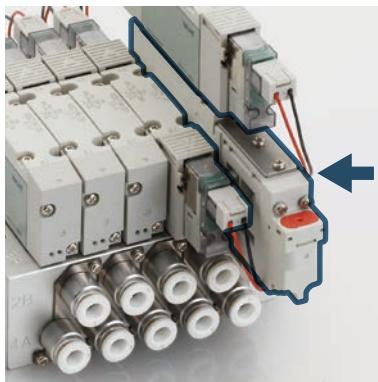

**Individual supply spacer**

Ideal for cylinder thrust adjustment in the individual valve pressure increase/decrease!

**Exhaust spacer**

Prevent malfunction of Single-acting cylinders in the individual exhaust!

**Pilot check valve spacer**

For intermediate valve stoppage.  
Provides a short-term positive lock  
of a double-acting cylinder

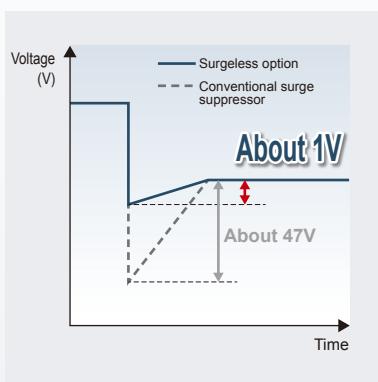

**Port size  
φ8**

**Port size  
φ10**

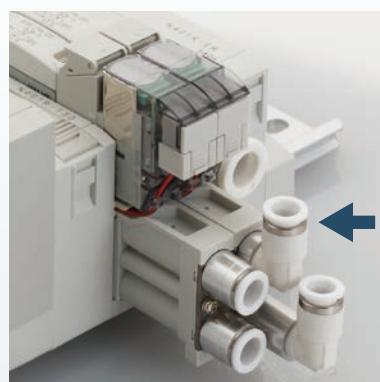

**More valve porting options**

4G1 now includes 8mm tubing (C8)  
4G2 now includes 10mm tubing

**Surge Protection**

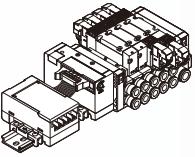

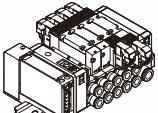

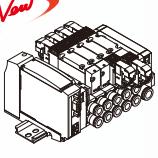

The coil surge voltage is reduced about 1V to protect the output contacts!

**Elbow fitting option for block manifold**

Improve the flexibility of valve installation  
with the addition of piping direction

Note 3 CL\* push-in fitting L type (upward) is available only for the single solenoid manifold. The port A is a long elbow and the port B is short elbow.

Note 4 A/B port sizes do not differ for the push-in fitting L type.

Note 5 Blank....Wired based on the type of valve used.

W\*....Wired for the double solenoid regardless of the type of valve used.

Note 6 3-position all ports closed and PAB connection are not provided with malfunction prevention valve (H). Refer to page 628 for details on malfunction prevention valve.

Note 7 The P port has a filter built inside as a standard.

Note 8 Specify the spacer mounting position and quantity in manifold specifications.

Stacking multiple spacers is not supported.

Combination with the masking plate is not supported.

Refer to page 472 to 476 for details.

Note 9 The direct mount type of M4GE1 cannot be changed to the DIN rail mount type after purchase.

Note 1: For mounting the silencer, check the dimensions in advance.

Note 2: Use SLW-8S for the M4GA2 DIN rail mount type. Interference occurs if SLW-8A is used.

### Elbow type specifications

- The L type push-in fitting (upward) is available only for the single solenoid manifold. The port A is a long elbow and the port B is a short elbow.
- A/B port sizes do not differ for elbow type specifications.

### How to fill out wiring specifications form

This is not required for standard wiring and double wiring.

\*: When T50 wiring is used, connector pin no. 9, 10, 19, and 20 cannot be specified because they are used for the external input power supply.

\*: Wiring is sequential from connector pin no. 1 in standard wiring. Contact CKD for the special wiring order.

### Cautions for reserved wiring

(1) Reserved wire(s) is/are provided on the masking plate for the reduced wiring manifold. (refer to page 612)

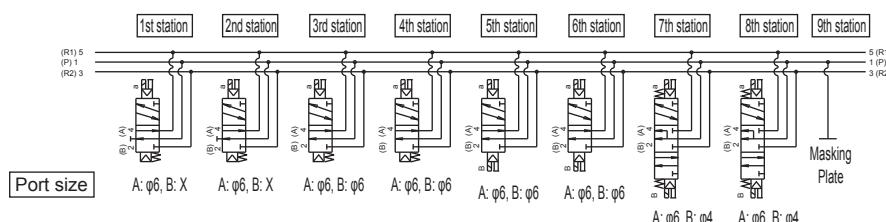

The number of reserved wires can be specified by selecting the masking plate in specifications.

4G \*R - MP (S)...1

4G \*R - MP (D)...2

Indicate (a) or (b) in manifold specifications for masking plate reserved wires.
